Reinforcing Bars

ASTM 615 – New billet-deformed bars. Reinforcing bars are commonly used for concrete reinforcement. The bar's surface is supplied with small lugs which eliminate motion of concrete in relation to the bar. We stock three grades.

No Grade – Bendable but can run into hard spots. This is the most economical grade.

Grade 40 – Best formability. Estimated Minimum Mechanical Properties (EMMP):

Yield – 40,000 psi. Tensile – 70,000 psi.

Grade 60 – Highest strength of our three grades. Estimated Minimum Mechanical Properties (EMMP): Yield – 60,000 psi. Tensile – 90,000 psi.

Wire Mesh

6" x 6" – wire pattern = 6" x 6" squares
 10/10 – wire gauge = 10ga. both directions
 6/6 – wire gauge = 6ga. both directions

6 x 6 10/10 – also known as – W1.4/W1.4
 6 x 6 6/6 – also known as – W2.9 / W2.9
